

Our Esteemed Services offered

- Water Treatment Plants
- Multi Media Filtration Plants
- Reverse Osmosis Plants
- Ultra filtration Plants
- Sewage Treatment Plants
- Annual Maintenance
- Chemical Cleaning
- Troubleshooting
- Case Study and Consultation
- Erection and Commissioning
- Turnkey Project Works
- Revamping
- De commissioning
- De watering

We offer the above said services and support for our Customers from the industries such as

- Residential Areas
- Manufacturing Units
- Hotels
- Hospitals
- Pharma Industries
- Shopping Complex.

Reverse Osmosis Plant

Reverse Osmosis system is applied in the field of water treatment to reduce the TDS from the water. The Treatment Process differs according to the source of water characteristics. The perfect Design and analysis makes the reverse osmosis plants successful.

These Reverse osmosis Systems are successfully applied in many of industries such as Hospitals, Hotels, Manufacturing Units, Residential areas, Pharmaceuticals etc.,

We Manufacture Skid Mounted Reverse osmosis plants according to the Clients Requirements and space constraints.

Multi Media Filtration System

We offer quality Multi grade & sand filters for water tank that are extensively used for the purpose of water purification. Water filters get blocked due to the accumulation of floc after certain period. Cleansing and maintenance of water filters is necessary so that contaminants may not enter in product water.

UV Sterilizer

Our organization is offering UV Sterilizers to our clients. These are ultraviolet systems. These are basically electrical devices which use ultraviolet energy for destruction of micro-organisms. These sterilizers do not use any type of chemical in this process. These sterilizers can be applied in the treatment process for disinfection.

Ultra Filtration Plant

To make our name in the specified stream, we have brought forward Ultra Filtration Plants, designed & developed as per the industry laid parameters. These purifiers are offered in various designs at reasonable rates according to site situations and Raw water parameters. Our customers are assured to have cost-effective products from our end as we design these products using proven technology and qualitative component.

Features:

- ❖ Low maintenance
- ❖ Easy to install
- ❖ Constant performance

Sewage Treatment Plant

We are engaged in offering our clients a high quality range of STP Plant. This plant is provided with customized solutions on demand. We develop this plant using superior grade basic material as per with industry standards. Customers can avail this plant from us within given time frame.

Features:

- ❖ Easy operation
- ❖ Reliability
- ❖ Long functional life
